

ANDRIANINA RANJARIVO

Software Engineering Student

ABOUT ME

Motivated Software Engineering student at University of Technology, Mauritius with hands-on experience in academic web and software development projects. Developed technical and problem-solving skills through university coursework and practical assignments involving website design and application development. Currently seeking an internship opportunity in the IT field to further strengthen practical experience and contribute to innovative technology projects.

EDUCATION

University of Technology of Mauritius 2024_2027

BSC(Hons) Software Engineering

Currently pursuing a Bachelor in Software Engineering at the University of Technology, Mauritius. Studies focus on core areas such as programming, web development, database systems, and software design principles. Practical skills are being developed through academic projects using technologies such as HTML, CSS, JavaScript, PHP, and MySQL, alongside strengthening of problem-solving and system analysis abilities.

STEM For Good Madagascar 2022-2023

IOT

Participated in the STEM for Good programme, focusing on applied technology and innovation. Gained practical experience in programming using Python and Scala, with exposure to Internet of Things (IoT) concepts. Worked on hands-on projects involving Arduino for building and prototyping embedded systems. Developed problem-solving, teamwork, and project development skills through real-world technical applications.

IFAGI Madagascar 2020-2023

Electronic

Completed foundational studies at IFAGI with exposure to core technical and scientific subjects. Gained basic knowledge in electronics, including circuit fundamentals and component functions. Strengthened mathematical skills and logical thinking through applied mathematics modules. Developed an early understanding of technical problem-solving and analytical approaches.

CERTIFICATION

KAGGLE 2023

Programming with Python

Completed a Python certification on Kaggle, covering beginner to intermediate-level concepts. Gained practical experience in Python programming, including data handling, basic algorithms, and problem-solving exercises through hands-on coding tasks and mini-projects.
